Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Response to Amendment***

1. The preliminary amendment submitted on 11 April 2003 has been entered.  
Currently claims 1-10 are pending.

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:  
  
The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
3. Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is vague and indefinite as it is unclear as to the types of materials encompassed by the phrase "means for supporting said bicarbonate salt". What exactly is applicant trying to claim? Is the means a substrate or what? Clarification is requested. The phrases "the required heat absorption", "the physical characteristics of said means", "said sodium bicarbonate" and "the heat absorbing application" lack proper antecedent basis.

In claims 4 and 5 it is unclear as to how these claims differ from each other. That is, how does imbedded within the salt differ from surrounded by the salt?

In claim 7 the phrase "the inner wall" lacks proper antecedent basis.

It is unclear as to how claim 10 further limits claim 1 when claim 1 recites a means for supporting the salt. How can the salt support itself?

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-2, 6 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Greene (US Patent No. 4,636,325).

The reference teaches, in the abstract, examples and the claims, a heat exchange fluid for closed loop solar energy collecting systems comprising a linear alkylbenzene sulfonate, a detergent mixture, a coloring agent, vitamin B6 and bicarbonate of soda.

The instant claims are met by the reference. While the reference does not recite that the composition is for the prevention of increase in temperature of heat sensitive devices, it should be noted that this is a future or intended use limitation and as such, it adds little or no patentable weight to the claim.

***References Cited By The Examiner***

6. The references are cited as showing the general state of the art and as such, they are not seen to teach and/or fairly suggest the instant invention. It should be noted

Art Unit: 1755

that while many of the references teach the use of sodium bicarbonate to protect heat sensitive devices, applicant has an effective filing date that predates the filing dates of the references and therefore the references are not considered to be prior art useable against the instant claims.
